

Fix Costly Leaks

**A leaky toilet
can waste 200
gallons of
water
EVERY DAY**

**Dripping faucets
can waste
up to 3,000
gallons
of water
PER YEAR**

Water conservation is critical to protecting this finite resource and also helps reduce your water and sewer bills.

Note: Stage One of the City's Water Conservation plan begins each August 15th and states that water will be used for beneficial uses only and prohibits all wasteful water use. To learn more, go to Utility Billing: Water Conservation on the City's website.
